Meteor Mechanical Couplings
and Flange Adaptors

NEW

BAYARD RANGE

WHO WE ARE

TALIS is a leading global provider of premium valves, hydrants and other solutions for water flow control.

With a varied range of products, we offer comprehensive solutions for the entire water cycle, from hydrants to butterfly valves, from knife-gate valves to needle valves. Our experience, innovative technology, global expertise and individual consultation process, form the basis for developing sustainable solutions for the efficient handling of the vital resource "water".

With over nine strong brands and 28 entities in Germany, France, Spain, Portugal, Italy, Great Britain, the Netherlands, Russia, Poland, Israel, China, the Middle East, Mexico, India, South Africa and Singapore, TALIS is the largest supplier of valve technology and first choice when it comes to water valves and services for the whole water cycle.

EASY INSTALLATION

REDUCED STOCKHOLDING

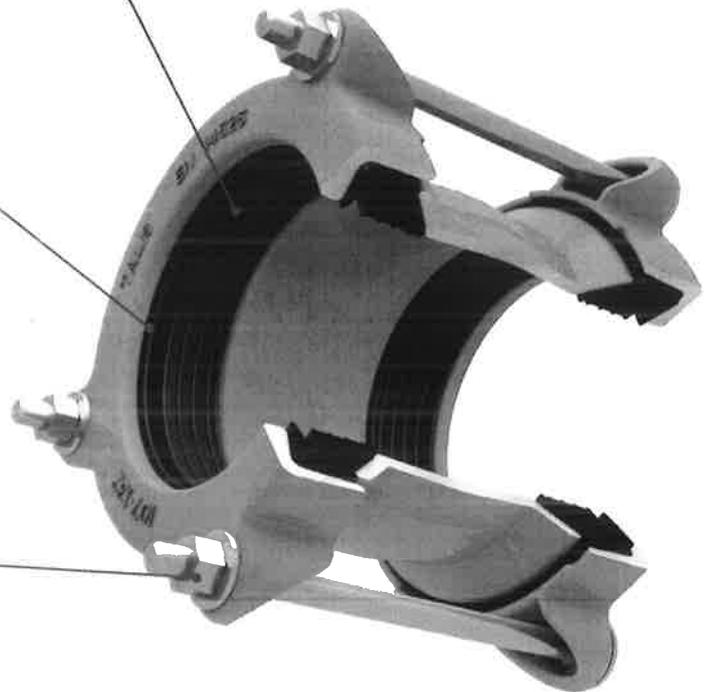

The Wide Tolerance design, on average 25mm covers most common pipe materials, including Steel, Ductile Iron, Cast Iron, PVC and Fibre-Cement. This dramatically decreases the amount of stock-keeping units necessary to cover a DN range, which has a positive effect on stock-holding and inventory turnover.

ACCOMMODATES PIPE MOVEMENT

Up to $\pm 6^\circ$ of angular deflection on each given end. This accommodates angularity between pipes caused by ground settlement during operation.

QUICK & EASY INSTALLATION

The captive, non-rotating bolt head require only a torque wrench for installation. Both Meteor Couplings and Flange Adaptors offer, with an optimal amount of bolts and a low torque value of only 40Nm, a very fast, efficient installation on site.

HIGHLY CORROSION RESISTANT

HIGH CORROSION RESISTANCE

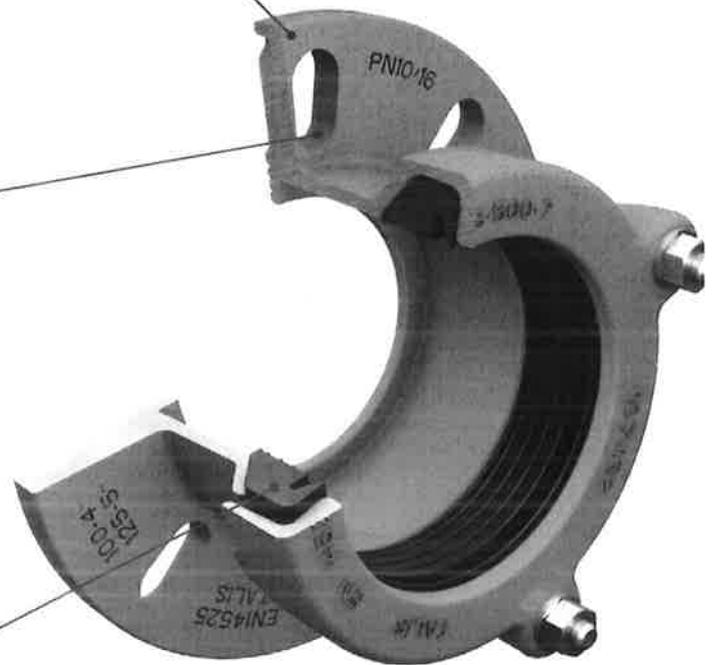

Standard coated in EN14901 approved Resicoat® Epoxy, with a minimum thickness of 250µm, providing excellent protection against corrosion and high resistance against impact, weathering, abrasion and chemicals. On top it offers good thermal stability and flexibility to deal with rough handling on site.

CONNECTION FLEXIBILITY

All Meteor flanges are multi-drilled, including EN1092-1, ISO7005 (PN10/16) and ANSI150. Offering great flexibility on site when facing situations to connect flange adaptors to other flanged equipment with different flange drillings.

EXCELLENT SEALING PERFORMANCE

The unique, patented Meteor gasket offers excellent sealing performance and supports a quick, reliable, low torque installation.

RELIABLE LEAK TIGHTNESS

UNIQUE PATENTED GASKET

The unique, patented, single piece Meteor gasket consists of 2 parts:

- 1 Base part of the gasket.
- 2 Smaller lip of the gasket.

In between is a recess (3), which is narrower towards its interior.

The smaller part of the gasket which is near to the recess allows a greater deformation for a smaller tightening torque.

After the closure of the gap of the recess, the deformation continues to adopt a form in which it comes to be supported on part of its base, before finally in the event of further deformation causing an expansion of the upper part.

BENEFITS:

- L Low torque assembly (40Nm.) that is the same for all pipes, independent of the diameter of the pipe to be assembled.
- L As a result of the recess the quantity of rubber material is clearly reduced.
- L Highly reliable fluid-tight connection.

MECHANICAL COUPLINGS AND FLANGE ADAPTORS

METEOR

TALIS Meteor wide range unrestrained mechanical couplings and flange adaptors are suitable for joining a wide range of the most common pipe materials. Due to its variety, it is particularly suited to repair situations where the pipe material and exact outside diameter is not known in advance. Meteor has excellent corrosion protection with 250 micron coating and stainless steel bolts and leak tightness is guaranteed by an EPDM gasket with a patented design.

FUNCTIONS

For joining two pipes, or a pipe and a flanged pipe or fitting together

ADVANTAGES

- └ **Wide range.** Average 25mm range to cover most common pipe materials.
- └ **Excellent corrosion protection.** 250µm epoxy coating and stainless steel nuts and bolts.
- └ **Secure watertight seal.** Patented EPDM gasket.
- └ **International approval.** Meets EN 14525, and has drinking water approved components to WRAS, ACS, KIWA and KTW W270 standards.

USES

└ Joining water pipes

- Ductile iron, cast iron, PVC, steel, GRP or fibre cement
- DN40-DN300
- Multi-drilled flange connection, including EN1092-1, ISO7005 (PN10/16) and ANSI150

Ideal for repair situations

CHARACTERISTICS

- L **Wide tolerance** - The Wide Tolerance design, on average 25mm covers most common pipe materials, including Steel, Ductile Iron, Cast Iron, PVC and Fibre-Cement. This decreases the amount of stock-keeping units necessary to cover a DN range, reducing stock holding
- L **High resistance to corrosion** - Standard coated in EN14901 approved Resicoat® Epoxy, with a minimum thickness of 250µm, providing excellent protection against corrosion and high resistance against impact, weathering, abrasion and chemicals. Stainless steel bolting also offers high corrosion protection to keep the product in good condition
- L **Reliable leak-tight sealing** - The unique, patented Meteor gasket allows a low torque installation, and guarantees an excellent seal
- L **Multi-drilled flanges** - drilling to EN1092-1, ISO7005 (PN10/16) and ANSI150 makes connection to other flanged equipment on site simple without having to order special products
- L **No special tools needed** - only a torque wrench is required due to the captive non-rotating bolt heads. Installation is fast and efficient on site with an optimised number of bolts and a low torque requirement of only 40N m
- L **Accommodates pipe movement** - Up to ±6° angular deflection on each socket accommodates angularity between pipes caused by ground settlement during operation
- L **Standards compliance** - Meets EN 14525 and various drinking water approvals

APPROVALS

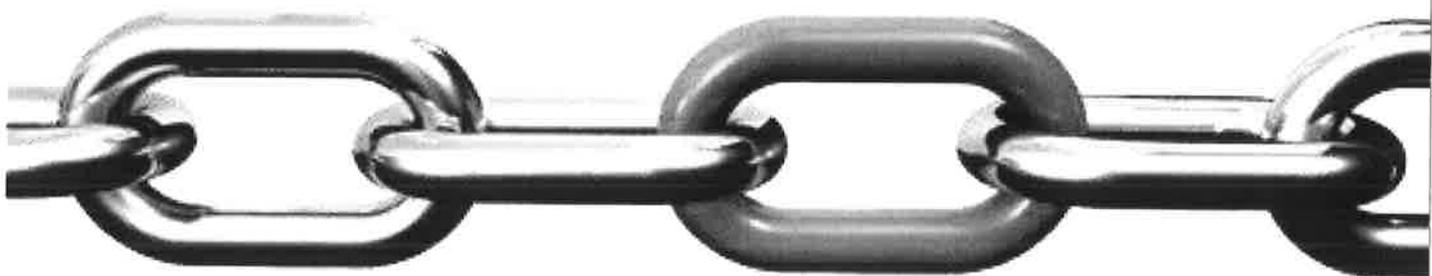

- L ACS WRAS, KIWA and KTW W270 component approval.

OPTIONS/VARIANTS

- L Flange adaptors and straight couplings in different sizes.

TECHNICAL DATA

- L **Size range** - DN40 - DN300 (OD44-361mm)
- L **Nominal Pressure (PN)**: Working 16 bar
- L **Material (Body and end rings)**: Ductile Iron EN-GJS-500-7, with min. 250 micron epoxy coating
- L **Material (Bolts and washers)**: Stainless Steel A2/A4
- L **Seals**: EPDM

TALIS is the undisputed Number One for water transport and water flow control. TALIS has the best solutions available in the fields of water and energy management as well as for industrial and communal applications. We have numerous products for comprehensive solutions for the whole water cycle – from hydrants, butterfly valves and knife gate valves through to needle valves. Our experience, innovative technology, global expertise and individual consultation processes form the basis for developing long-term solutions for the efficient treatment of the vitally important resource “water”.
