Spira-trol™ Two-port Control Valves

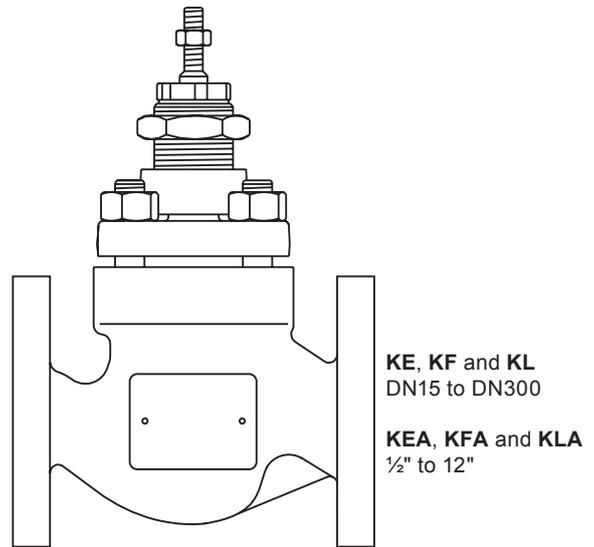

EN Standard KE, KF and KL DN15 to DN300 and ASME Standard KEA, KFA and KLA ½" to 12"

Description

Spira-trol™ is a range of two-port single seat globe valves with cage retained seats conforming to EN and ASME standard. These valves are available in three body materials in sizes ranging from DN15 to DN300 (½" to 12"). When used in conjunction with a pneumatic or electric linear actuator they provide characterized modulating or on/off control.

Spira-trol™ valve characteristic - options:

KE and KEA Equal percentage (E) - Suitable for most modulating process control applications providing good control at all flowrates.

KF and KFA Fast opening (F) - For on/off applications only.

KL and KLA Linear (L) - Primarily for liquid flow control where the differential pressures across the valve is constant.

Important note: Throughout this document, reference has been made to the standard KE or KEA control valve. With the exception of trim type, the KE, KEA, KF, KFA, KL and KLA control valves are identical.

Spira-trol™ valve options:

	PTFE chevron seals	Standard
	Graphite packing	High temperature applications
Stem sealing	Bellows / PTFE (B)	Zero emissions and thermal fluids
	Bellows / graphite (C)	Zero emissions, high temperature applications and thermal fluids
	Bellows / graphite secondary seals (D)	Zero emissions and high temperature applications
Seating	Metal-to-metal	431 stainless steel - standard 316L stainless steel - DN15 to DN100 only
	Soft seating	Up to 200 °C (392 °F) - PTFE for Class VI shut-off
